

Magellan® Solutions Developer Kit

April 23, 2007

This certificate is the result of Magellan Quality Analysis of the mapping product, hereafter called "Product" created by Geosustavi, a company based in Croatia, with Magellan Solutions Developer Kit (MSDK) version v1.59 for the coverage of the following areas:

- Topo Slovenia, topoSLO.imi, v1.00

The above map products were certified for the following Magellan GPS devices:

Used h/w:	Version	Basemap
eXplorist 400	4.2.02	NA/EU, NA
eXplorist 500	5.2.03	NA/EU
eXplorist 600	6.2.03	NA/EU
eXplorist XL (Luna)	9.1.05*, 9.1.55, 9.2.10	NA/EU, EU, NA
CrossoverGPS	1.56*	

**Not tested with custom language files as these versions of firmware are not supported for localization*

The following tests, as well as other more minor preliminary tests have been successfully passed by Magellan Certification Group:

- Product derived from MSDK does not cause any failure of any compatible Magellan GPS Units.
- Product contains database groups, including but not limited to roads, waterways, railroads, and parks, as well as "Point of Interest" (as defined below) categories ("POI"). Database groups and POIs have been properly labelled with their unique title or feature name.
- QuickInfo function works properly. QuickInfo is the process of selecting a feature within the map and viewing its attribute information in a "pop up" window.
- Detailed maps database query have timely response and do not cause unit failure.
- Standard Magellan GPS Unit functions, including zoom, pan, select, query, etc. works properly.
- User data, such as Waypoints, User POIs, Routes, and Tracks, as created by an end user functions properly.
- Both Alphabetic Search (database queries) and "Search by Nearest" (spatial queries) work properly and not cause any failure.

This certificate allows Geosustavi to use the Magellan Certified logo on the Product and Product packaging.

North America: 960 Overland Court San Dimas, CA 91773

Europe: Z.A.C. de la Fleuriaye B.P. 60433 44474 Carquefou Cedex France

This certificate does not guarantee the accuracy of the Product content which must be checked by Geosustavi prior to its delivery to the end-users.
